DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claim 15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "a respective multistage optical switching matrix for selectively connecting the further plurality of optical inputs and outputs to inputs and outputs of the single stage switching matrix, the multistage switching matrix comprising a multistage Clos network in which the single stage switching matrix comprises one stage of the Clos network". It is unclear how the multistage optical switching matrixes and the single stage switching matrix constitute the Clos network; e.g., the Clos network might be made of: the single stage switching matrix and two switch fabrics from one multistage optical switching matrix (such as S2/S3/S1, or S1/S4/S5 in Figure 2 of applicant); or the Clos network might be made of: one switch fabric from one multistage optical switching matrix, the single stage switching matrix and another switch fabric from another multistage optical switching matrix (such as S3/S1/S4 in Figure 2 of applicant);

that is the single stage switching matrix is the middle stage of the Clos network). The claim is indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Allowable Subject Matter

4. Claims 17-29 are allowed.
